DETAILED ACTION

Claim Rejections – 35 USC § 112

Claims 1-14 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1 and 8 the “maximum tensile stresses imposed on the pipe” are undefined as to how they are applied to the pipe coupling rendering the scope of the claim indefinite as to the angle of each corrugation. Further, “the pipe” in that phrase lacks proper antecedent basis since it is unclear which “pipe” is being referred to.

Claim Rejections – 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 10-14 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 3,318,335 to Heller. The Heller torsional pipe coupling illustrates (see figs. 21, 22, 28, 33) the claimed present invention having inlet and outlet ends with an intermediate portion there between. The intermediate portion includes a plurality of corrugations disposed about the circumference with each corrugation having a first and second end which blend into the inlet and outlet portions of the coupling. Each corrugation can be considered disposed substantially perpendicular to maximum tensile stresses when the such tensile stresses are applied perpendicular thereto. As shown in the figures the transition area forms a smooth curve which appears either elliptical (fig. 21) or circular (fig. 22) to an axis of the pipe coupling.

Allowable Subject Matter

Claim 9 would be allowable if rewritten to overcome the rejection under 35 U.S.C. § 112 and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
